

In March 2022, the State of Oklahoma passed SB1369 and the subsequent rules, requiring all health care providers to report data to and utilize the State Designated Entity (SDE) for Health Information Exchange beginning July 1, 2023.

All health care providers shall:

- Establish a direct, secure connection to the state-designated entity for HIE and submit data in the form and format as defined on the Office of the State Coordinator for HIE website.
- Actively use the HIE services to securely access records during and/or in support of patient treatment or health care operations.

State-Designated Entity (SDE):

MyHealth Access Network has been designated as the state-designated entity (SDE) for Health Information Exchange and is here to help you meet the requirements of SB1369.

Background:

MyHealth Access Network is a nonprofit health information exchange created by a grassroots coalition of health care industry stakeholders across Oklahoma. Through this coalition, members securely share electronic health records to achieve better, safer, and lower cost care for all.

Additional Benefits of Joining MyHealth

- Better monitor and improve care quality and timeliness.
- Reduce health care costs associated with redundant testing, hospital admissions, and emergency department visits.
- Improve care coordination during transitions between health care settings.
- Comply with State and Federal programs such as MIPS, ONC and CMS interoperability rules, and other requirements.
